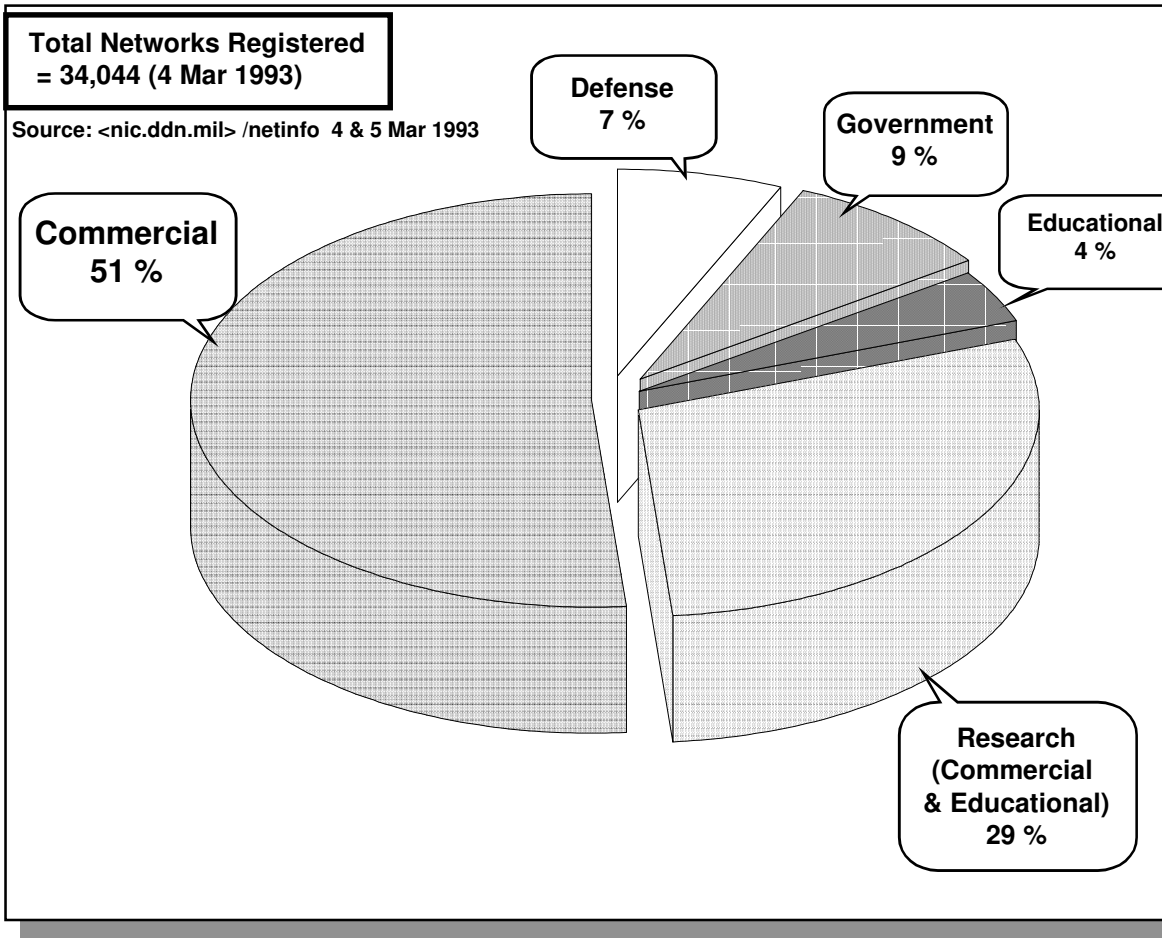
Distribution of Internet Network Registrations



Explanatory note: The Network Information Center (NIC) operates under deleg from the Internet Assigned Numbers Authority (IANA). Every network using th Protocol (IP) should properly register with the NIC and obtain a unique networ which depending on the type of assigned address, can support various numbe computers on the network. The information shown here is taken directly from NIC IP network registration database on 4 March 1993 and correlated to the NI information in its contacts database on 5 March 1993

Historical Profile of IP Network Registrati
