Service Datasheet: CHORUS® Binary Evaluation Package

- ❖ **Rapid assessment of CHORUS fit to customer requirements**
- ❖ **Hands-on experience**
- ❖ **Support from Chorus engineers**

The CHORUS Binary Evaluation Package permits customers to rapidly and efficiently assess CHORUS for their requirements. With the support of Chorus' engineers, it allows hands-on experience of CHORUS Operating System technology. It provides customer engineers with a unique opportunity to quickly learn how to use CHORUS system software in their own design.

The CHORUS Binary Evaluation Package applies to CHORUS/MiX V.4 on PC/AT 386/486 or to CHORUS Simulator on Sun SPARCstation, both referred to as "CHORUS" in the following text.

The CHORUS Binary Evaluation Package consists of the following components:

(a) Three sets of CHORUS user manuals and one binary copy of CHORUS to be installed on up to three different machines available for an evaluation period of up to 90 days. These are to be returned to Chorus Systems at the end of the evaluation period.

(b) A hardware support system (PC/AT 386/486 or a Sun SPARCstation) is available optionally for the duration of the evaluation period.

(c) Consulting support by a Chorus engineer at customer premises:

c1. One day of on-site consulting by a Chorus engineer, at the beginning of the evaluation period. Consultation covers:
- Assistance in defining an optimal evaluation program for the customer,
- Installation of CHORUS Binary Evaluation copies at customer's premises.

c2. One day of on-site consulting by a Chorus engineer, at a mid-point in the evaluation period at customer's request.

c3. One day of on-site consulting by a Chorus engineer, at the end of the evaluation period for review and analysis of the results of the evaluation program with customer's evaluation team.

(d) E-mail hot-line with emergency telephone support for the duration of the evaluation period.

(e) Free maintenance support during the evaluation.
